

4 LED Horticultural PowerStars

IHH-xx04-xxxx-SC2x1-WIR200

Product Overview

IHS PowerStars are our basic building block in horticultural development. Compact Size (L x W x H): 20mm x 20mm x 3.85mm with mounting holes using M3 screws allows easy installation.

Available with 200mm connecting wires, chaining multiple PowerStars together to form complex systems is very quick and simple – excellent for prototyping your design. 4 LED Horticultural PowerStars are also available in parallel versions.

In our portfolio we have 3 types of PowerStars available;

N3535: Industry standard 3535 package with a ceramic substrate for superior reliability at higher temperatures. UVA technology with offerings at 385, 395, 405 and 415nm. Current range from 100 to 1000mA

OSRAM OSOLON® SSL: OSOLON® SSL delivers the high efficacy that is necessary for professional indoor and outdoor lighting. The ceramic based package with its superior corrosion robustness addresses perfectly the needs for long lifetime applications. Current range from 100 to 1000mA

OSOLON Square: OSRAMs most compact 2W high power LED with extremely low thermal resistance, remarkable high efficiency, high reliable and superior corrosion robustness. Current range from 200 to 1800mA

Many other wavelengths are available, such as IR, so if you don't see the wavelength value you are looking for, please ask.

Accessories Designed for the PowerStar

Heat Sink kits with pre-tapped screw holes and mounting screws. Standard lengths of 20,40,60 and 80mm. They also come with Thermal Interface Material (TIM) attached to the top surface and mounting screws. Available in Black.

IHS have produced a range of High-performance, cost effective Thermal Interface Materials (TIM) to perfectly match their standard products.

Our product fills the air pockets between the two surfaces, forming a continuous layer to conduct heat away from the LED to the heatsink. As you'd imagine, this is why it's called thermal interface material. IHS offer TIM in three options – double sided adhesive, single sided adhesive and no adhesive.

IHS have developed a driver to help in the development of Tuneable White and RGB/RGBW LED products. The PSU can also be used with any system that requires up to 4 channels of controllable LED drive.

Select from our range of IP rated AC/DC LED drivers suitable for use with our range of LED engines. All tried and tested ready to plug and play...

The majority of the products in this flyer are available for sale through RS. If you require small quantities please go to their website to check their stock situation.
