

6 & 18 LED Mid-Power Horticultural Linear Strips

IHS-P2xx-xxxx-SD221.

Product Overview

IHS Mid-Power Linear Strips are ideal for close to crop illumination. Available in 100 or 300mm lengths. Available with 200mm connecting wires or male and female SMT connectors, chaining multiple Mid-Power Linear Strips together to form complex systems is very quick and simple – excellent for prototyping your design.

In our portfolio we have 1 type of Mid-Power Linear Strips available;

OSCONIQ® P2226: High-efficacy Mid-Power LED with long lifetimes also at high currents and high junction temperatures. Current range from 30 to 250mA

Many other wavelengths are available, such as IR, so if you don't see the wavelength value you are looking for, please ask.

Accessories Designed for the Mid-Power Linear Strips

Secondary lens and reflectors from our lens partner LEDiL to enhance or widen the beam. LEDiL lens have mounting pins/clips which fit in conjunction to the Mid-Power Linear Strip.

 Standard lengths of 100, 300mm. Available in Black.

IHS have produced a range of High-performance, cost effective Thermal Interface Materials (TIM) to perfectly match their standard products.

Our product fills the air pockets between the two surfaces, forming a continuous layer to conduct heat away from the LED to the heatsink. As you'd imagine, this is why it's called thermal interface material.

IHS offer TIM in three options – double sided adhesive, single sided adhesive and no adhesive.

Select from our range of IP rated AC/DC LED drivers suitable for use with our range of LED engines. All tried and tested ready to plug and play...

The majority of the products in this flyer are available for sale through RS. If you require small quantities please go to their website to check their stock situation.
